PAST PERFORMANCE HISTORY

With a proven track record of excellence, ESI has consistently delivered exceptional training solutions to government agencies and commercial clients. Our past performance highlights our expertise in crafting tailored training programs that empower professionals to excel in their roles.

Training Project Highlights

HHS ASPR National Disaster Medical System (NDMS) Disaster Medical Information Suite Training	HHS ASPR NDMS Moodle Learning Management Systems Design & Development	DC Department of Health Salesforce Development & IT Support
DC Department of Healthcare Finance Medicaid Management Information System	MD Department of Health DDA Long-Term Services & Support (LTSS) System Training	DC Department of Employment Services Virtual Learning Platform

CLIENT SUCCESS STORY

Our Challenge:

Our client sought to optimize utilization of Electronic Medical Records and the Joint Patient Assessment and Tracking System, the standard platforms used by public health clinicians for recording patient encounters and tracking during ESF #8 events.

Our Solution:

We designed a customized training program with a focus on enabling clinicians to set up and maximize the use of the EMR and JPATS systems, enhancing patient safety, and improving operational decision-making efficiency.

Results:

ESI's training enabled over 2,000 NDMS health professionals to effectively utilize EMR and JPATS systems during disasters. This enhanced patient care, operational efficiency, and data transmission for situational awareness and resource management.

Customer Satisfaction:

" Your contemporaries did an outstanding job of sharing expertise and knowledge, providing insights, and delving into relevant and important subject matter that attendees will find crucial as they continue to confront the challenges associated with savings lives and protecting Americans from 21st century health security threats. "

— Ron Miller, Director, HHS Assistant Director of Preparedness and Response (ASPR)
