Educology SOLUTIONS INC.

HEALTH IT SOLUTIONS

ESI's health IT services strengthen our nation's public health posture. Our Health IT Professionals have experience with the latest health systems from Cerner, Epic, and other vendors – to help you standardize clinical and business processes, train your users, and manage your integrated health environment.

CORE SERVICES

LEGACY SYSTEMS MODERNIZATION	CLINICAL SYSTEMS INTEGRATION	WORKFLOW ENGINEERING
APPLICATION TRAINING	"GO LIVE" SUPPORT	HELP DESK SUPPORT

ESI AT A GLANCE

Educology Solutions Inc. (ESI) is an 8(a) Woman Owned healthcare consulting firm. We provide strategy and talent solutions to augment and accelerate technology initiatives by providing strategic planning, execution and ongoing guidance. Located in the District of Columbia, we provide the full range of implementation and training support on solutions for managing EHR, health information, and patient movement systems for public health agencies, providers, and Federal emergency preparedness and disaster response.

CONTRACT VEHICLES

How our clients buy our services:

We are serving out public sector clients through the **SBA 8(a) program and GSA** contract vehicles.

SBA 8(a) Certified SBA Sole Source Contracts: The SBA 8(a) and Woman Owned Small Business Programs allows federal agencies to award sole source contracts to ESI up to $4M. Initiate a contract with a simple high-level SOW and alleviate 60-90 days of acquisition time. Sole source contracts can be completed within a few days. Talk to us and we can help with the process.

GSA IT Schedule 70, SIN 132-51: Use our IT Schedule 70 (Schedule No. **GS-35F-616GA**), GSA's Multiple Award Schedule (MAS) contract to purchase our services. It is one of the largest contracts in government used by federal and state agencies to purchase technology products and services.

Mission Oriented Business Integrated Services (MOBIS), PODS-2006-R-918-00: DC Government agencies and other local jurisdictions can purchase our services using this citywide multiple award schedule contract by issuing task orders or purchase orders against the schedule.

NAICS CODES:

CLIENT HIGHLIGHT

NATIONAL DISASTER MEDICAL SYSTEM TRAINING & SUPPORT

The strength of our nation's public health and medical infrastructure and the capabilities necessary to quickly mobilize a coordinated national response to disasters and emergencies are vital to our national security. ESI develops curriculum and trains Disaster Medical Assistance Teams (DMAT) on key applications used in theater to provide and manage critical patient care.

We trained personnel on the EMR, the standard system used to capture and record patient encounters. Patient safety and critical, life-saving operational decisions are dependent upon effective utilization of the EMR system.

JPATS is the standard system used to track patients throughout the continuum of the patient movement system. Critical in maintaining in-transit visibility, it begins when the patient is identified for movement using the Federal Gov't ESF #8.
